For Immediate Release

"Logres of Swords and Sorcery: Goddess of Ancient" Six Million Download Milestone Announcement

Aiming Incorporated (TOKYO: 3911) and Marvelous Incorporated (TOKYO: 7844) announces the six million download milestone of their co-developed and co-published full-fledged MMORPG for the smartphone, "Logres of Swords and Sorcery: Goddess of Ancient".

Based on the PC browser game "Logres of Swords and Sorcery", "Logres of Swords and Sorcery: Goddess of Ancient", a native application developed for the smartphone, is a light and easy MMORPG that one can play in sessions that take only a few minutes and optimized for single-handed gameplay. Alongside a wide variety of job classes, equipment a plenty, and a command-battle system where one can freely use their skills, enjoy battles and brave adventures with friends not only from the comfort of your room but also outside or even while in transit — all within the palm of your hand.

Initially launched in December 2012, the game has gone on to amass a wide user base, and obtained the top spot for Gross Sales in the iOS App Store on March 25, 2015.

Both Aiming Incorporated and Marvelous Incorporated are and will continually strive to make further efforts in making "Logres of Swords and Sorcery: Goddess of Ancient" a fun game for everyone.
